**AIM & SCOPE**

*International Multidisciplinary Scientific GeoConference & EXPO - SGEM strengthened its position as one of the largest and successful geoscientific forums in Europe, with popularity exceeding the boundaries of the European Union. This exceptional success was achieved due to the efforts of all SGEM participants from 2001 to this day. They all created the best Scientific Conference in the European Union - SGEM by their scientific contribution, hearty selflessness and distinguished participation during the years.*

*We look forward to receiving your paper and hearing you presentation at the up-coming SGEM 2011 conference. Become a SGEM Lecturer, a Delegate or an Exhibitor!*

*We combine all geosciences connected to the ecological equilibrium of our Planet. Uniting our efforts and we established the largest International Multidisciplinary Scientific GeoConference & EXPO.*

***WE ARE ALL UNITED BY ONLY ONE CAUSE:** The cause of a better, cleaner and more beautiful place, where our children will grow up. A place known as the Planet Earth.*

*The SGEM GeoConference focuses on the latest findings and technologies in surveying geology and mining, ecology, and management, in order to contribute to the sustainable use of natural resources. In this regards all theoretical, methodological and conceptual reports presenting contemporary geoscience development and problems solving ideas are expecting with a great interest. Special attention will be given to reports, proposing science based ideas for decision-making and adaptation to the new reality of global changes. All accepted papers will be published in a conference proceedings (ISBN-13: 978-954-91818-14) indexed by ISI Web of Knowledge, Web of Science.*
